Clearing of Rumors in Preparation for An Earthquake Startles the City Early Coming New Fac.s.

Baseball rumors are gradually drawing in and ncentrating themselves about the known facts which THE EVENING WORLD has duly chronicled as they came out, and which will develop into complete stories after the Brotherhood meeting of Monday next.

The story of the coming meeting and pe

The story of the coming meeting and possible alliance of the Western Association and the miner leagues, printed in The Evening Wolld's Sporting Extra of yesterday, has furnished a theme for much discussion to-day.

The National League will be particularly concerned in that direction, as such an alliance as that hinted at might make the magnates' huns for new players more than interesting.

There is a big and paying field for baseball in the West, and Secretary Morton's Association doesn't propose, evidently to have its propapulled out without at least the semblance of a struggle.

The grounds to be occupied by the Brotherhood club in this city will, it is said, begin where the centre field of the present Polo grounds is bounded by the fence.

In this case the small boy habitue of the bing above the grounds may berhaps already begin to build on the pleasure of seeing baseball as it might be played in a two-ring circus.

Whether this sort of a circus will be comparable to that which will come up when all the rival interests of players and magnates commeuce to get in their work nobody can indige until all the meetings are over, all the plans are made public and all the "surprises" are aprung.

GLASOOW, Nov. 2 .- At the scene of yesterday's disaster, at Templeton's carpet factory, wenty-nine bodies had been recovered this

forenoon. The number of girls killed is now definitely stated at thirty.

Heartrending scenes occurred constantly, as ondy after body was taken from the ruins. The new building, the falling walls of which crashing upon the roof of the factory caused the disaster, had but just been left by the workmen.

It is probable that more of the mill girls
would have escaped but for a block in the exit,
